

Accumulator Charging Kit

The inflation kit is an important professional tool for inflating hydraulic accumulators, checking gas pressure, and correcting gas pressure. Our company provides two types of inflatable tools, including FPU Charging Kit and GCQJ Type Accumulator Charging Accessory.

FPU Charging Kit

The FPU charging kit is safe, reliable and easy to operate. It has complete accessories and meets the requirements of different national standards.

- Model: FPU
- Pressure Gauge(3 Kinds as Standard): 10MPa, 25MPa, 40MPa
- Charging Pipe(M)=1.5(Standard)

(Other optional length)

- Nitrogen Bottle Connection G0=G5/8

(It can be customized according to the requirements of different countries)

- Accumulator Gas Connection Thread

Standard: M28X1.5

Adapter: M14X1.5 UNF5/16 UNF1/2 UNF5/8 UNF7/8 G1/4

- Suitcase

GCQJ Type Accumulator Charging Accessory

The GCQJ accumulator charging accessory has the characteristics of compact structure, safety and reliability, pressure resistance, good impact resistance, and easy use.

- Model: GCQJ
- Pressure Gauge: 10MPa, 25MPa, 40MPa
- Hose Specification:

Inner D(mm) X No. Of Layer= Φ 6x1,Length(mm)=1500(Standard)

(Other optional length)

- Accumulator Gas Connection Thread: M28X1.5
